

Cashmaster StoreOne

**VALIDATE AND SECURE
NOTES AT THE POINT OF SALE**

Why Cashmaster StoreOne?

Cashmaster StoreOne provides secure and accurate note validation at the point of sale, helping businesses reduce exposure to counterfeit currency while keeping accepted notes safely stored during daily trading.

It supports consistent cash handling practices and helps protect revenue without adding complexity for staff at the till.

Designed for Everyday Performance

Cashmaster StoreOne is built for busy retail environments, validating and securing notes in 2.5 seconds to support fast, uninterrupted transactions.

Its compact steel construction and multiple fixing points allow flexible installation across a wide range of counter and POS layouts.

Suitable for

- ✓ Retail
- ✓ Grocery
- ✓ Banking
- ✓ Hospitality & QSR

Key Benefits

Save Time at the Till

Fast validation keeps queues moving and transactions flowing smoothly.

Simple Installation

Compact design with multiple mounting options, making it ideal for under-counter installation and easy setup.

Protect Every Note

Advanced counterfeit detection helps prevent fraudulent notes from being accepted.

Secure Storage

Validated notes are stored in an internal stacker, with optional secondary locking.

Cashmaster[™]
StoreOne

Engineered for Daily Use

Built to validate and securely store notes at the point of sale, Cashmaster StoreOne helps businesses reduce risk while maintaining efficient cash handling during daily operations.

Key Features

Advanced Counterfeit Detection

Validates notes using reliable authentication technology.

Fast Note Acceptance

Accepts notes in approximately 2.5 seconds.

Multi-Currency Support

Compatible with Euro, Pound Sterling, and US Dollars.

Secure Internal Stacker

Stores up to 300 validated notes.

Compact Steel Enclosure

Designed for durability in retail environments.

Flexible Installation

Multiple mounting points on all four sides.

More Than a Drop Safe

Cashmaster StoreOne can operate as a stand-alone unit or be integrated into a wider cash management setup, supporting consistent note handling across the store.

By validating notes as they are received and storing them securely, it helps reduce manual handling and supports more controlled cash processes at the till.
